Leadership & Vision

A message from our Chairman

LEADERSHIP

Chairman's Message

As Chairman of High Creativity Industrial Metal Factory (HCIMF Co.), I am proud to lead a team committed to excellence in steel fabrication and machining. Our journey since 1992 has been defined by an unwavering dedication to quality, innovation and client satisfaction.

Our name reflects our mindset. We are often the partner clients turn to when faced with difficult technical challenges that others cannot solve. Mastering complex, custom fabrications has defined our legacy and cemented our standing across the Jubail industrial region. That same approach carries into our everyday production of piping supports, platforms and screw conveyors, built on a culture of continuous improvement and safety and on partnerships founded on trust. Looking ahead, we remain committed to sustainable practices and the highest standards of craftsmanship.

V.M. Joseph

Chairman

High Creativity Industrial Metal Factory Company

Who We Are

A Saudi steel fabrication and machining company serving the Jubail industrial cluster since 1992.

Corporate Overview

HCIMF Co. was established in 1992 and has grown into a specialist in steel fabrication and machining works — piping supports, pipe clamps, medium steel structures, tanks and conveyors — operating as a sub-contractor to Saudi Aramco and SABIC.

Our Core Strength

A well-organised workshop with adequate manufacturing facilities, backed by qualified technicians working under experienced management. Quick response, fair pricing, dependable quality and prompt delivery define how we work.

Vision & Mission

What we are working towards, and how we get there.

Our Vision

To be the leading provider of high-quality steel fabrication and machining solutions, recognised for our commitment to excellence, innovation and customer satisfaction.

Our Mission

To deliver superior steel fabrication and machining works that exceed customer expectations through the highest standards of quality, precision and reliability — fostering a culture of continuous improvement, innovation and safety while maintaining sustainable practices and long-term relationships with our clients and partners.

Quality Policy

HCIMF Co. is fully committed to delivering the highest quality products. Qualified technicians, guided by experienced management, work meticulously to ensure the quality and standard of every job assigned.

A dedicated QC Inspector verifies every finished item against the client's drawings and specifications before it leaves the workshop.

1

Client Drawings

Work begins from the drawings and specifications issued by the client.

2

In-Process Control

Fabrication is supervised at every stage against the approved drawing.

3

QC Inspection

Our QC Inspector checks each finished item for dimensional and specification conformity.

4

Release

Only items that match the specification are released to the client.

Health, Safety & Environment

HSE excellence is our top priority — and it is non-negotiable.

HSE Policy

Every individual is responsible for upholding these commitments.

Safe Workplace

A safe and healthy working environment for every employee, contractor and visitor.

Full Compliance

Compliance with all relevant HSE laws, regulations and standards is non-negotiable.

Hazard Control

Hazards identified and mitigated through risk assessment and proactive measures.

Training & Awareness

Continuous training empowers staff to prioritise safety and environmental care.

Incident Prevention

Prevention and transparent reporting underpin an accountable HSE culture.

Environmental Care

Minimising waste, conserving resources and reducing emissions across operations.

Regular HSE audits and reviews ensure ongoing improvement against our objectives.

Core Capabilities

Three service lines, all delivered from our own workshop in Al Jubail.

Machining Works

- Milling, cutting & facing
- Shaping & threading
- Drilling & bending
- Plate shearing
- Plasma cutting

Rolling & 3D Bending

- Plates
- Angle bars
- U-channels
- I-beams
- Pipes

Pipe Clamp Fabrication

- Shoe clamps
- Saddle clamps
- U straps & U bolts
- Hanger clamps with clevis
- Steel & FRP pipe, 0.5"—90"

What We Manufacture

Piping supports, medium steel structures and fabricated equipment.

Piping Supports

Pipe Clamps

Shoe Supports

Saddle Supports

U Straps & U Bolts

Pipe Racks

Platforms

Handrails

Cage Ladders

Heavy-Duty Gratings

Mini Tanks

Screw Conveyors

Fabricated to client specifications, built for complex technical demands. [Click here for a gallery of our finished products.](#)

Clients & Sector Experience

HCIMF Co. works as an approved sub-contractor for Saudi Aramco and SABIC.
